ALL METAL ARCHITECTURAL PANELS

Why choose from the All Metal Architectural Panel Range?

All Metal manufacture a profile that will suit your project. Choose from our range and be assured our bespoke and yet efficient manufacturing process will deliver. We have the most up to date machinery to provide you with the highest quality product.

The Architectural Panel Range is made from non-combustible material - roll-formed steel. We know compliance matters.

Design is encouraged. Whether placed internally, externally, vertically or horizontally our Architectural Panel Range can cover your needs.

Let us work with you to reach your design aspirations.

All Metal Snaplock

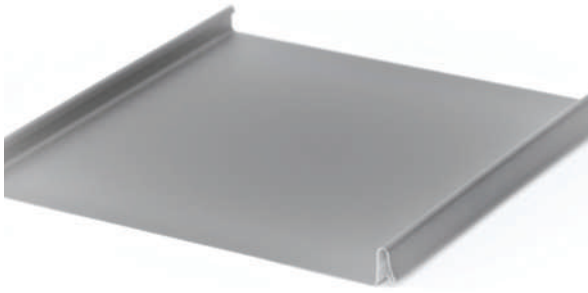

Roofing and walling applications

Simple and secure clipped installation

Ideal for low pitched roofing due to increased rib height and availability of longer panels

Cover widths of 290mm or 490mm with a 38mm high rib

Rib heights of 25mm, 38mm, 45mm and custom panel widths available

All Metal Nailstrip

A popular choice used for roofing and walling

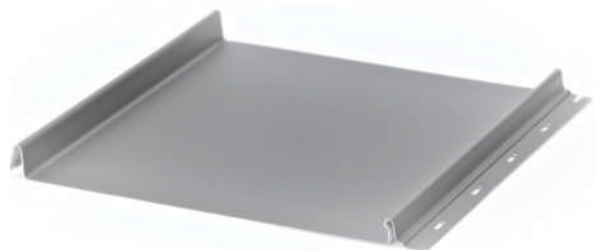

Offering a modern aesthetic appeal with a familiar ribbed profile

Ideal for residential and commercial applications

Simple direct screw fix installation

Cover widths of 265mm and 465mm with a 38mm high rib

Rib heights of 25mm or 38mm and custom panel widths available

All Metal Interlock

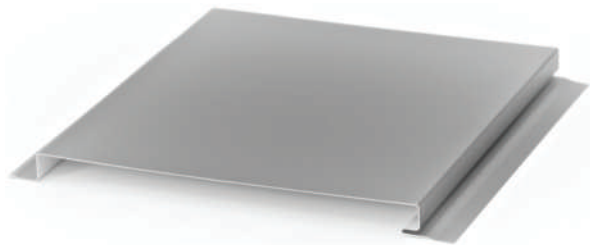

Used for interior and exterior wall cladding

Suited to horizontal, vertical and diagonal applications

Combine custom sized pans with recessed shadow lines to create striking patterns and unique designs

Cover widths of 285mm or 485mm with a panel height of 25mm

Custom panel widths available

All Metal Standing Seam

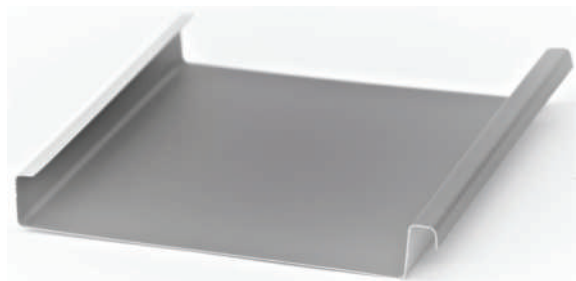

Roofing and walling applications

The original flat pan profile

Suited to curving and tapering with a flexibility to meet design requirements

Cover widths of 325mm to 525mm with a 25mm high rib

Rib heights of 25mm or 38mm and custom panel widths available

Modern Interiors

All Metal Architectural panels can be custom designed to help create your next beautiful interior design.

All Metal Architectural panels are versatile, long lasting and low maintenance. They are ideal for use on soffits and ceilings, as decorative finishes, in reception areas or as internal walls. Choose from our wide range of finishes. Talk to us about custom colours, panel widths and shapes.

Accessories

Finish in style, let us help with your design ideas. At All Metal we have everything you need to complete your installation.

If you need any rainwater products or custom fabrication, our modern facilities and a skilled production team are willing to help. Our custom made corner profiles and factory cut angled panels are made to suit your architectural design requirements.

Performance Testing

Materials utilised by All Metal are tested by our suppliers. These tests include:

Fire Resistance and Fire Rating as per tests conducted by product coil suppliers (AS/NZS 1530.3)

Scratch Resistance

QUV Resistance

Bend Test

Impact Resistance

Humidity Resistance

Salt Spray

Safety and compliance matters

Warranty Available

Note: Oil canning can occur in flat metal products creating a visible ripple effect in areas of an installation. The condition is normally related to thermal movement. By taking due care during the installation process and avoiding excessively large flat pans, oil canning can be minimised. Oil canning is not a defect of the product and does not adversely effect the warranty or durability of the material.

The logo for 'All Metal' is presented in a white, bold, sans-serif font within a blue rounded rectangular box. This box is set against a dark blue background that features a stylized, light blue swoosh graphic extending to the right.
